EDUCATION

University of Waterloo

Honours Bachelor of Computer Science, Co-op

President's Scholarship of Distinction | Cindy Colvin Computer Science Scholarship

Waterloo, ON

Expected Apr. 2031

Merivale High School

International Baccalaureate Diploma

IB Score: 43/45 | 98.67% Average | Silver Medal | Gold Community Involvement Award | French Immersion Certificate

Ottawa, ON

June 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks: React, Next.js

Developer Tools: Git, VS Code, Jira, Arduino IDE, Edge Impulse, Socket.IO

Technologies: REST APIs, Google Gemini API, Machine Learning, Embedded Systems, BDD Testing

Languages Spoken: English, French, Mandarin

EXPERIENCE

Software Automation & Testing Intern

Nokia Future Tech Program

July 2025 – Aug. 2025

Ottawa, ON

- Developed and organized 5+ automated test suites using Python and the Radish BDD framework, improving maintainability and scalability.
- Created and executed API test scripts to validate functionality and identify software defects.
- Collaborated with cross-functional engineering teams to document test scenarios, troubleshoot issues, and improve product quality.
- Tracked defects and participated in Agile planning using Jira.

Data Analyst (FSWEP)

Royal Canadian Mounted Police (RCMP)

Jan. 2024 – Aug. 2025

Ottawa, ON

- Processed and analyzed over 500 Access to Information and Privacy (ATIP) records while ensuring compliance with federal information management standards.
- Reduced processing backlog by more than 10% through efficient workflow organization and record management.
- Performed quality assurance and data verification while maintaining 100% accuracy in a high-volume environment.
- Managed 10+ concurrent deadlines while handling confidential information with strong attention to detail.

Teaching Assistant

Kumon North America

Sep. 2025 – Present

Ottawa, ON

- Provided individualized mathematics and reading instruction to 30–40 students aged 5–14.
- Monitored student progress and adjusted learning plans to improve understanding and consistency.
- Communicated student progress with instructors and parents to support academic success.

PROJECTS

Auri – AI-Powered Accessibility Wearable

React, Next.js, TypeScript, Edge Impulse, Arduino UNO R4 WiFi

github.com/lindaeq/auri

- Built an AI-powered wearable wristband using Edge Impulse-trained audio classification models to detect alarms, sirens, barking, crying, and custom voice triggers, delivering real-time haptic, OLED, and LED alerts for deaf and hard-of-hearing users.
- Developed a full-stack companion app in React, Next.js, and TypeScript, integrated with the Google Gemini API and Socket.IO, to customize vibration patterns, alert priorities, and listening modes.
- Engineered a functional hardware prototype on an Arduino UNO R4 WiFi integrating microphone input, OLED display, RGB LED, vibration motor, and portable power system with real-time backend communication.
